

Edwing Gomez

Semi-Senior Full Stack Developer

[LinkedIn](#) | [GitHub](#) | Edwinggomez98@gmail.com | +58 424-7597776

PROFESSIONAL PROFILE

Full Stack Developer with over 4 years of experience specializing in the JavaScript ecosystem (Angular, React, Node.js/NestJS) and PHP. Expert in performance optimization (40% API latency reduction), database migration (SQL to NoSQL), and integration of complex ERPs. Proven ability to lead the complete development lifecycle, from architecture to AWS deployment.

WORK EXPERIENCE

Full Stack Developer (Consultor / Contractor) Kumisoft & Arrsoft | Remote | **January 2022 – Present**

Technical leadership in multiple high-impact projects, ranging from Fintech architectures to SaaS solutions and legacy migrations.

- **Real Estate Platform & Sales Ecosystem (PHP / JS / MySQL / WordPress):** I developed a full-stack, highly customized web portal for the Chilean market. I implemented an advanced quoting tool with server-side filtering and optimized database indexing to process real estate indexes and generate automated quotes via email. Additionally, I developed launch landing pages with payment gateway integration (Flow.cl) for online bookings and built the lead generation integration, leading the migration of the sales flow from Pipedrive to GoHighLevel.
- **ERP Integration Middleware (Node.js / Backend):** Architecture and development of a high-concurrency middleware to synchronize inventories and prices between ERPs (Siigo, Bsale) and Marketplaces (MercadoLibre, Falabella, Amazon) via Multivende API. I ensured real-time data consistency.
- **Plataforma EdTech "FinUp" (Angular 17+ / NestJS / MongoDB):**
 - **Role Evolution:** I started leading the Frontend architecture with **Angular 17+** and **NgRx** later expanding my responsibility to **Full Stack** to perform a critical server re-engineering.
 - **Backend Migration:** I led the transition from SQL to **NoSQL (MongoDB)**, achieving a latency reduction from 12s to **2-4s (~75% improvement)**.
 - **Frontend Impact:** I optimized the loading speed in a **40%** and I implemented scalable modules for subscription and streaming management.
- **Exchange de Divisas Fintech (Angular / Node.js):** Full Stack Development of an exchange platform (CLP/VES/COP). I created the administrative panel for financial auditing and compliance, implementing scalable business logic for expansion to new currencies.
- **SaaS E-commerce Multi-tenant (PHP / MySQL):** Platform construction that allows users to deploy customized online stores. Full integration of payment gateways (**Mercado Pago**) and order automation.

Frontend Developer Kumisoft | Remote | **January 2022 – December 2022**

- **Zendesk integrations (Next.js):**Development of custom applications to optimize customer support workflows.
- **Plataforma Web3 / NFT (React):**Collaboration in the development of a digital asset marketplace, integrating smart contracts for secure transactions.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, PHP, SQL.
- **Frontend:** Angular (v16+), NgRx, React, RxJS, HTML5/SCSS.
- **Backend:** Node.js, NestJS, Express.
- **Databases:** MongoDB, MySQL.
- **Infrastructure & Tools:** AWS (Cognito), Docker, Git, Linear, Trello.

Languages:

- **Spanish:**Native.
- **English:**Full Professional Competence (Reading and Writing) / Conversational

EDUCATION

- **Computer Engineering** | *IUT, Táchira, Venezuela* | *Graduated 2020*
